

What Is ECOSF?

Introduction, Mission & Vision

The **ECO Science Foundation (ECOSF)** is the premier scientific institution of the **Economic Cooperation Organization (ECO)**, dedicated to advancing science, technology, and innovation across the ECO region. Established as a platform for regional cooperation, ECOSF promotes research, education, and collaboration among member states to address shared challenges and unlock the region's developmental potential through science and technology.

Mission

ECOSF's mission is to **strengthen scientific and technological capacity** in the ECO region by fostering research excellence, promoting STEM education, supporting innovation, and facilitating cross-border collaboration. The Foundation aims to bridge knowledge gaps among member states, empower the next generation of scientists, and translate scientific research into practical solutions that drive sustainable economic and social development.

Vision

ECOSF envisions a **knowledge-driven ECO region**, where science and innovation are catalysts for inclusive growth, regional integration, and resilience. The Foundation aspires to be a leading hub for regional scientific cooperation, enabling member states to leverage their collective expertise, address critical challenges, and achieve sustainable prosperity through science, technology, and innovation.
